
Mawer Global Balanced Fund

Interim Management Report of Fund Performance

For the Period Ended June 30, 2022

This Interim Management Report of Fund Performance contains financial highlights but does not contain either interim or annual financial statements of the investment fund. You may obtain a copy of the interim or annual financial statements at no cost, by calling 1-844-395-0747, by writing us at Suite 600, 517 – 10th Avenue SW, Calgary, Alberta T2R 0A8, or by visiting our website at www.mawer.com or SEDAR at www.sedar.com.

Unitholders may also contact us using one of the above noted methods to request a copy of the investment fund's proxy voting policies and procedures, annual financial reports, proxy voting disclosure record, or quarterly portfolio disclosure.

This Interim Management Report of Fund Performance includes certain statements that are "forward looking statements". All statements, other than statements of historical fact, included in this report that address activities, events or developments that the portfolio advisor, Mawer Investment Management Ltd. (the "Manager"), expects or anticipates will or may occur in the future, including such things as anticipated financial performance, are forward looking statements. The words "may", "could", "would", "should", "believe", "plan", "anticipate", "expect", "intend", "forecast", "objective" and similar expressions are intended to identify forward looking statements. These forward looking statements are subject to various risks and uncertainties, including the risks described in the Simplified Prospectus of the Fund, uncertainties and assumptions about the Fund, capital markets and economic factors, which could cause actual financial performance and expectations to differ materially from the anticipated performance or other expectations expressed. Economic factors include, but are not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

All opinions contained in forward looking statements are subject to change without notice and are provided in good faith but without legal responsibility. The portfolio advisor has no specific intention of updating any forward looking statements whether as a result of new information, future events or otherwise, except as required by securities legislation. Certain research and information about specific holdings in the Fund, including any opinion, is based upon various sources believed to be reliable, but it cannot be guaranteed to be current, accurate or complete. It is for information only, and is subject to change without notice.

Management Discussion of Fund Performance

Investment Objectives and Strategies

The Mawer Global Balanced Fund (the "Fund") aims to protect and grow investors' capital through capital appreciation and the receipt of dividend and interest income. The Fund invests in treasury bills and commercial paper, corporate and government bonds, global equities, and other Mawer Funds.

The Manager examines current market statistics and makes an assessment of future outcomes based upon a probability-based scenario analysis. Using these techniques the Manager constructs the asset mix. Bonds are used primarily to control risk and the Manager focuses on security, sector, credit and curve analysis in making investment decisions. Investment considerations may include interest rates, yield spreads, exchange rates, structures, credit spread and fundamental analysis of sovereign, government, corporate and structured finance issuers. In equities we search for wealth-creating companies whose equities can be purchased at a discount to their intrinsic value.

Risk

This Fund is suitable for investors seeking long-term growth and who have a low-to-medium tolerance for risk. The Fund's risk rating changed to low-to-medium from medium during the period. General risks of investing in this Fund are outlined in the Prospectus and include the possibility of reduction in value of any given investment, liquidity risk, interest rate risk, and currency risk amongst others. Since this Fund invests in Series O units of other Mawer Mutual Funds there are two additional risks: multi-class risk and fund on fund risk.

The Manager limits the risk of investing in a single asset class by limiting the amount invested in equities in any one industry, and by limiting the percentage of the Fund that can be shifted in a single move from one asset class to another.

Given the difficulty in consistently predicting interest rate moves, we limit exposure to this risk factor. In setting policy, the Canadian bond portfolio's duration is set within 1 year on either side of the index. As of June 30, 2022, the Mawer Canadian Bond Fund's duration was 7.48 years compared to the FTSE Canada Universe Bond Index duration of 7.39 years. From an exposure perspective, the weight of the Canadian fixed income allocation within the Mawer Global Balanced Fund, increased from 28.7%, at the end of 2021, to 30.6%, at the end of June.

The Fund's exposure to foreign equities (outside of Canada) decreased to 56.2% from 62.4%. The Fund's equity holdings are in eight of the eleven GICS sectors and are most heavily weighted to Industrials (21.0% of equity), Information Technology (19.0%) and Financials (15.5%). The combined exposure to the top three sectors as a portion of equity is 55.4%, which is a decrease from 59.6% at the end of 2021.

Results of Operations

The Fund's net assets decreased 14.5% to \$1,824.8 million from \$2,134.6 million at June 30, 2022. Of this change, -\$316.5 million is attributable to investment performance and \$6.7 million was due to net contributions to the Fund.

The Manager assesses the fund's underlying securities for liquidity on a quarterly basis. During the period the fund has remained in compliance with National Instrument 81-102 and has maintained an illiquid concentration of less than 10% of the funds Net Asset Value. During the period there were no notable redemptions to the fund that affected its liquidity.

Mawer Global Balanced Fund

The Fund's A Series units returned -15.0% (after management fees) through the first 6 months of 2022 versus -15.4% for the internal global balanced benchmark. The blended benchmark consists of 5% FTSE 91-day Treasury Bill Index; 35% FTSE Canada Universe Bond Index; and 60% MSCI ACWI Index (Net). All performance values are in Canadian dollar terms.

Recent Developments

Investors have had a punishing year so far in 2022 ... and in the second quarter, there were even fewer places to hide. Ever-higher measures of inflation have emboldened influential central banks such as the U.S. Federal Reserve to take a tougher stance against inflation. Despite a reversal toward the end of the quarter, bond yields moved higher in most major economies. As in Q1, longer duration equities such as those in the technology sector continued to lead the sell-off given their sensitivity to rising discount rates.

The level of inflation and the degree of central bank intervention needed to rein it in have given way to concerns about economic growth, exacerbated by a cornucopia of shocks such as war in Ukraine, COVID-19 lockdowns in China, as well as the impact of rising food and energy prices on consumers. In a sign of the degree of investor anxiety, both the euro and the Japanese yen have slid to multi-decade lows relative to the U.S. dollar. The combination of higher discount rates and a more muted outlook with respect to companies' top-line growth and margins have added further fuel to the sell-off.

As the performance of various asset classes so far this year suggests, risks are clear and present: inflation, central bank tightening, and the withdrawal of accommodative monetary policy; war and its knock-on impacts to globalization and various commodity markets; and economic growth headwinds tied to COVID-19 shocks and the impact of rising food and energy prices on consumers. Margin pressures due to rising wage and input costs are beginning to impact corporate profits and we've seen severe reactions to earnings disappointments, particularly with respect to future guidance. The European economic outlook looks particularly grim given the increasing risk of a Russian gas embargo to the European Union. The recent performance of equities, credit spreads, economically-linked commodities such as copper, and the U.S. dollar all point to an increasingly pessimistic outlook.

In managing portfolios, we often ask ourselves: are we over-exposed in any areas, and do we have appropriate mitigation strategies in place? Despite the general direction of recent trading activity, the portfolio remains tilted toward higher-quality companies with more recurring business models. This is very much intentional. Those parts of the market that have fared relatively better so far this year may also prove to be more fragile, especially if the outlook for economic growth continues to deteriorate.

Whereas the risks may appear heavily one-sided, we have been focused on ensuring that our emotions stay balanced. Our philosophy and process orient us toward businesses that are enduring, that have the ability to exercise pricing power through the value propositions they provide to their customers, and that are run by able and honest managers. We have been revisiting our discounted cash flow models to ensure that they reflect the economic scenarios that many of these businesses may face (e.g. the potential for higher and more sustained labour costs or inventory levels). We're speaking with management teams to understand how they're planning to tackle a potentially more challenging environment; e.g., if they are planning on reducing spending to protect their margins, are they cutting the fat or the bone?

Yet, while the odds of a soft landing may appear increasingly long, it is not a foregone conclusion. And regardless of how the economic outlook may evolve, we take comfort in the notion that over the long-term, stock prices tend to follow wealth-creation. As such, we continue to lean heavily into our philosophy and process in an effort to responsibly steward our clients' investments through uncertainty.

Related Party Transactions – Management Fees

The Portfolio Advisor receives management fees, which are calculated for Series A units as 0.95% per annum of the net asset value of the Fund calculated on a daily basis. Management fees for Series O units are payable directly to the Manager by Series O investors and not by the Fund.

The terms of the Management Agreement were amended January 4, 1994, to grant the Manager of the Fund the ability, at their discretion, to reduce the management fees for large investors. This reduction is effected by means of a management fee distribution and will be automatically reinvested in additional units of the Fund at the net asset value of the Fund on the date of distribution. Mawer also receives fees for performing administrative services. As at June 30, 2022 the Fund owes Mawer \$0 related to these administrative services.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six-month period ended June 30, 2022, and for each of the past five years ended December 31 as applicable. This information is derived from the Fund's unaudited interim financial statements and audited annual financial statements which are prepared in accordance with IFRS.

Net asset value per unit¹	16.22	19.21	17.67	16.79	14.97	14.85

⁽¹⁾ This information is for the period ended June 30, 2022 and December 31 of any other period(s) shown.

⁽²⁾ Management expense ratio is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net assets during the period.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Advisors manage its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Past Performance

Sales commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the Prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any investor that would have reduced returns. Mutual funds are not guaranteed. Their value changes frequently and past performance may not be repeated.

Mawer Global Balanced Fund

The Fund's performance numbers assume that all distributions are reinvested in additional units of the Fund. If you hold this Fund outside of a registered plan, income and capital gains distributions that are paid to you increase your income for tax purposes whether paid to you in cash or reinvested in additional units. The amount of the reinvested taxable distributions is added to the adjusted cost base of the units that you own. This would decrease your capital gains or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

The past performance of the Fund is set out in the following charts.

Year-by-Year Returns

The bar charts below show the Fund's annual performance in each of the past 10 years, if applicable, to December 31. The charts show in percentage terms how an investment made on January 1 would have increased or decreased by December 31 of the fiscal year.

Series A

Series O

⁽¹⁾ This information is for the period ended June 30, 2022 and December 31 of any other period(s) shown.

^(*) The Fund's start date was June 28, 2013.

Annual Compound Returns

The following table shows the historical annual compound total return of the Fund for the periods shown ending on June 30, 2022. The annual compound total return is also compared to the Internal Global Balanced Benchmark ("GB Benchmark") calculated on the same compound basis. All index returns are calculated in Canadian dollars on a total return basis, meaning that all distributions are reinvested.

	1 Year	3 Year	5 Year	Since Inception ^(*)
Mawer Global Balanced Fund – Series A	(8.3)%	3.1%	5.2%	7.5%
Internal Global Balanced Benchmark	(11.2)%	2.5%	4.2%	6.9%
Mawer Global Balanced Fund – Series O	(7.3)%	4.2%	6.3%	8.7%
Internal Global Balanced Benchmark	(11.2)%	2.5%	4.2%	6.9%

^(*) The Fund's start date was June 28, 2013.

The GB Benchmark is a benchmark prepared by the Manager and is designed to reflect the average asset mix of a universe of balanced fund managers which consists of the FTSE Canada 91 day T-Bill Index (5%); FTSE Canada Universe Bond Index (35%), designed to reflect the Canadian bond market; and MSCI ACWI (60%), designed to reflect global stock markets. Prior to May 31, 2021 the GB Benchmark consisted of the FTSE Canada Universe Bond Index (20%); FTSE World Government Bond Index (20%); and MSCI ACWI (60%).
