Investment Strategy

In order to achieve its investment objectives, the Manager positions the Fund along points on the yield curve which offers the most attractive yields relative to the duration of the security, maintaining a bias for the part of the curve that offers attractive characteristics in the context of the central bank policy. The Fund will typically overweight sectors that provide attractive yields relative to Government of Canada Bonds with an emphasis on investment-grade corporate, provincial and municipal bonds. The Manager will utilize in-house, bottom-up credit analysis and will monitor bond markets in an effort to identify mispriced securities.
